Journal of Non-Newtonian Fluid Mechanics, 42 (1992) 395–396
Elsevier Science Publishers B.V., Amsterdam

Contents of Vol. 42

Vol. 42, Nos 1+2

An improved GMRES method for solving viscoelastic fluid flow problems
A. Fortin and A. Zine (Montréal, Qué., Canada) 1

Flow of viscoplastic fluids in a rotating concentric annulus
S.H. Bittleston (Cambridge, UK) and O. Hassager (Lyngby, Denmark) 19

Extending filaments of an Oldroyd fluid
R.A. Keiller (Cambridge, UK) 37

Modelling of the extensional flow of the M1 fluid with the Oldroyd equation
R.A. Keiller (Cambridge, UK) 49

Anisotropic channel flow of fiber suspensions
M.C. Altan (Norman, OK, USA), S.I. Güçeri, and R.B. Pipes (Newark, DE, USA) 65

Numerical analysis of three-dimensional Bingham plastic flow
C.R. Beverly and R.I. Tanner (Sydney, NSW, Australia) 85

Finite-amplitude time periodic states in viscoelastic Taylor–Couette flow described by the UCM method
R.J. Northey, R.C. Armstrong, and R.A. Brown (Cambridge, MA, USA) 117

Calculation of steady-state viscoelastic flow through axisymmetric contractions with the EEME formulation
P.J. Coates, R.C. Armstrong, and R.A. Brown (Cambridge, MA, USA) 141

Elastic short wave instability in extrusion flows of viscoelastic liquids
K. Chen (Tempe, AZ, USA) and D.D. Joseph (Minneapolis, MN, USA) 189

Structural viscosity of electrorheological fluids
A.A. Mokeev (Vitebsk, Byelorussia), E.V. Korobko, and L.G. Vedernikova (Minsk, Byelorussia) 213

Short Communication

A note on the effect of vorticity on the deformation and breakup of polymer drops
W.J. Milliken and L.Y. Leal (Santa Barbara, CA, USA) 231

Book Review 241

Announcement 243

Calendar 245

Vol. 42, No. 3

Sink flows of a suspension of rigid rods: the failure of a similarity situation
R.A. Keiller, J.M. Rallison and J.G. Evans (Cambridge, UK) 249

The determination of dynamic moduli at high frequencies
P.R. Williams and D.J.A. Williams (Swansea, UK) 267

The consistent streamline–upwind / Petrov–Galerkin method for viscoelastic flow revisited
M.J. Crochet and V. Legat (Louvain-La-Neuve, Belgium) 283

Numerical simulation of circular entry flows of fluid M1 using an integral constitutive equation
H.J. Park and E.M. Mitsoulis (Ottawa, Ont., Canada) 301

The structure of anomalous entry flow patterns through a planar contraction
K. Chiba, S. Tanaka and K. Nakamura (Osaka, Japan) 315

Analysis of simple constitutive equations for viscoelastic liquids
A.I. Leonov (Akron, OH, USA) 323

Evaluation of an integral constitutive equation for nonlinear viscoelasticity
J.S. Vrentas, C.M. Vrentas (University Park, PA, USA) and D.C. Venerus (Chicago, IL, USA) 351

Non-planar shear flows for non-aligning nematic liquid crystals
M. Luskin (Minneapolis, MN, USA) and Tsorng-Whay Pan (Houston, TX, USA) 369

Short Communication

Bernoulli equation and the competition of elastic and inertial pressures in the potential flow of a second-order fluid
D.D. Joseph (Minneapolis, MN, USA) 385
